CHAILLU

Our Chaillu collection is a study in texture. Using only the best materials like natural, undyed wool and chenille we have created an unfussy collection that focuses on the methods and materials in their purest forms. The result is a collection of beautifully crafted flatweaves in sophisticated, easy to use colorways available in classic solids and small scale patterns.

Each pattern highlights a different method of weaving, always allowing the quality of the materials to shine through.
